Easy Level

1. Sum Function

Function banao jo 2 numbers lekar unka sum return kare.

add(5, 3)
# 8

---

2. Even/Odd Check

is_even(8)
# True

---

3. Largest of Three Numbers

largest(5, 9, 2)
# 9

---

4. Factorial

factorial(5)
# 120

---

5. Count Vowels

count_vowels("hello")
# 2

Medium Level

6. Reverse a String

reverse_string("python")
# nohtyp

---

7. Check Palindrome

is_palindrome("madam")
# True

8. Prime Number Check

```
is_prime(17)
# True
```

9. Count Uppercase Letters

```
count_upper("PyThOn")
# 3
```

10. Find Second Largest Element

```
second_largest([5,8,2,9,1])
# 8
```

Functions + Lists

11. Return List Sum

```
list_sum([1,2,3,4])
# 10
```

12. Return Largest Element

```
find_max([5,8,1,9])
# 9
```

13. Remove Duplicates

```
remove_duplicates([1,2,2,3,3,4])
# [1,2,3,4]
```

14. Count Frequency of Element

```
frequency([1,2,2,3,2], 2)
# 3
```

15. Common Elements of Two Lists

```
common([1,2,3,4], [3,4,5,6])
# [3,4]
```

Slightly Challenging

16. Check Anagram

```
is_anagram("listen", "silent")
# True
```

---

17. Fibonacci Function

```
fibonacci(7)
# [0,1,1,2,3,5,8]
```

---

18. Dictionary Key with Maximum Value

```
max_key({
  "A":50,
  "B":80,
  "C":70
})

# B
```

---

19. Intersection of Three Sets

```
common_set({1,2,3,4}, {2,3,5}, {2,3,7})
# {2,3}
```

---

20. Recursive Factorial (Without Loop)

```
factorial(5)
# 120
```

Score Guide

- 0–5 problems → Beginner

- 6–10 → Basic Functions Clear
- 11–15 → Good Python Foundation
- 16–20 → Ready for NumPy Start
